## LifeWay Worship Announces Music Integration with Corevalus Systems

### *WorshipCharts now available on SamePage performance stations*

NASHVILLE, Tenn.—LifeWay Worship has entered into an agreement with Corevalus Systems that integrates the digital portion of the LifeWay Worship Project and SamePage™ technologies, thus allowing the inclusion of LifeWay's WorshipCharts with the purchase of SamePage performance stations.

Worship leaders, praise bands, and orchestra members will now be able to customize their choice of over 20 different instrumental parts for variations of 975 hymns, worship songs, and hymn arrangements while synchronizing performances through a complete interactive system for planning, displaying, and mixing live music.

"SamePage provides high tech integration for many areas in the live music performance environment," says Bill Klaber, President of Corevalus Systems LLC, manufacturer of the SamePage Music Management System. "We feel that our collaboration with LifeWay adds yet another valuable tool for worship leaders through immediate music import of the LifeWay Worship Project into the SamePage performance stations. Going totally paperless is now a reality that saves time and money for churches. We know that churches will be excited about this wonderful solution!"

"Everyone at LifeWay Worship is excited about the connection our resources now have with SamePage—I know I am!" added Mike Harland, Director of LifeWay Worship. "This remarkable and innovative tool, loaded with the great content from The Worship Project, would give any church all the capability they would need to lead an awesome worship experience. Amen!"

This agreement applies SamePage features to all 674 titles in the 2008 editions of *Baptist Hymnal* and *The Worship Hymnal*, plus an additional 301 hymns and worship songs found at [LifeWayWorship.com](http://LifeWayWorship.com).

#### **ABOUT COREVALUS SYSTEMS, LLC**
